ABOUT PROGRAM

- The MCA program is an extensive postgraduate program designed to prepare students for thriving careers in the software industry and academia.
- With a focus on both core and emerging areas, this program offers a perfect blend of teaching and research to equip graduates with theoretical knowledge and practical skills.
- This programme drives the students in a sound background of theoretical and application- oriented courses relevant to the latest computer software development.
- It puts emphasis on the application of software technology to solve commercial mathematical, statistical, computing, network and communication problems.

Program Highlights

01

In-Depth Technical Knowledge: Gain a thorough understanding of the technical aspects of software development.

02

100% Placement Assurance: Experience a Transformative journey with a 360-degree skill-building approach and assured job opportunities.

03

Diverse Career Opportunities: MCA professionals are highly sought after in industries like IT, engineering, and beyond.

04

Latest Tools & Technologies: Stay ahead with programming languages and tools tailored for modern, fast-paced application development.
